

12/5/2011

S K Oil Sales had been providing us with box oil for our fryers.

Recently, they introduced an all “NEW” Oil Rack System designed to fit into a conventional kitchen like ours.

In less than an hour, they had the system in place, requiring, no electric, no pipes, and no hoses.

With this new system came the Zeco Pro 3 Battery Operated Oil Filtration System.

They trained our staff on all aspects of the system and within a few days our staff was very comfortable with the system.

Today, we have a very safe and cost effective system that allows us to easily maintain very clean fryers, exceptionally clean oil, along with extended oil life while delivering quality fried food products to the level of our customers’ expectations.

We are very satisfied and recommend S K Oil Sales for your oil management needs.

Regards,

David Moore
