

12/1/2011

S K Oil Sales installed an outdoor bulk oil system into our location. They did an excellent job and we are very pleased with its performance.

It is a very safe system for our employees as they no longer have to lift oil boxes or worry about transporting hot expired oil. It has also reduced our overall cost and environmental footprint with the elimination of oil boxes.

The service and support have been excellent.

Recently, S K Oil Sales team introduced the all "NEW" Zeco Pro 3 Oil filtration technology. With the Zeco Pro 3 Battery Operated Oil Filtration System, our staff could safely wash our fryers and filter our oil daily.

We are now using the Zeco Pro 3 Oil Filtration System to wash our fryers and filter our oil daily. This has resulted in much cleaner fryers, better fried foods, and longer oil life.

It is very rare to have a have an oil management partner that not only cares about providing excellent oil and services, but provides long term total oil management solutions.

S K Oil Sales is a company that we highly recommend to anyone looking for a 100% total oil management solutions partner.
