To whom it may concern,

I am the Manager at Twin Peaks restaurant in Scottsdale, AZ, and would like to share my experience since partnering with S&K Oil Sales. Before being introduced to S&K Zeco Oil Management Program, we were using 10-11 jugs of oil a week. Since using the Zeco Pro -3 double filtration & transport system we not only reduced our oil consumption by 30%, but also maintained our high food quality standard and created safer work environments for both front and back cooking lines.

S&K also installed a Zeco Oil Rack that works with the Zeco Pro -3 to help further our cost savings and reduces our oil box waste.

We are extremely satisfied with the performance and results and would highly recommend the Zeco Pro Oil Management Program for your Total oil management solution.

Sincerely,

Bill Machiavello

Manager

Twin Peaks - Scottsdale
